PROFESSIONAL EXPERIENCE

Contentstack, Virar, India

Associate Software Engineer

July 2022 – Present

- Contributed towards the development of **Developer Hub**. Contentstack Developer Hub is an app development framework/portal that developers can leverage to rapidly build, host, and publish ready-to-use private or public apps.
- Integrated **Hosting with Launch** feature, enabling users to directly link & host the project on Launch in Developer Hub.
- Worked on End to End Automation Testing using Playwright for **Version Control** and **Restore Functionality**.
- Developed & Managed **Version Control & Restore** to Previous Version Feature for apps in Developer Hub.
- Contributed towards UI of **Release Tags** for managing apps in Developer Hub.
- Contributed towards **Multiple Redirect URL Support** for OAuth in Developer Hub.
- Developed & Managed End to End feature: **Content Models** in the Marketplace, streamlining the process for users to build their content types swiftly.
- Introduced a "Use Prebuilt" call-to-action (CTA) to enhance user experience when creating content types from the Content Type listing page, significantly accelerating the onboarding process and boosted the platform's accessibility for diverse user needs.
- Integrated the **support** for enabling users to host their **Starter apps using Launch**. Launch is a Managed hosting solution recommended for those who wish to leverage Contentstack's infrastructure for ease of deployment.
- Maintaining & providing support for the [source plugin](#) for static site generators for **GatsbyJS**. This plugin sources data from our CMS and converts it into nodes, enabling its utilization as a GraphQL query within the GatsbyJS framework, achieving weekly 3k downloads on [npm](#).
- Developed a beginner-friendly **App boilerplate** for Contentstack, simplifying the onboarding process for new developers.
- Added a new **Starter App** built using **Nuxt.js version 3** into the Ecosystem.
- Take end-to-end responsibility for the features.
- Setted standard design patterns in the UI code.

Technical Consultant

Feb 2022 – May 2022
